the 1990s, the number of people in the world who are under 15 years of age has increased by 1.2 billion, from 1.1 billion in 1980 to 2.3 billion in 1999. The number of people aged 15 years and over has increased by 1.5 billion, from 2.5 billion in 1980 to 4.0 billion in 1999.

There are a number of reasons why the world population is growing so rapidly. One of the main reasons is that the number of children born to each woman has increased. This is due to a number of factors, including improved medical care, increased access to contraception, and a shift in cultural values.

Another reason for the rapid growth of the world population is that the number of people who are surviving into old age has increased. This is due to a number of factors, including improved medical care, increased access to health care, and a shift in cultural values.

The rapid growth of the world population has a number of implications for the future. One of the main implications is that there will be a need for more resources to support the growing population. This includes food, water, and energy.

Another implication is that there will be a need for more jobs to support the growing population. This is because the number of people who are entering the workforce is increasing, while the number of people who are leaving the workforce is decreasing.

The rapid growth of the world population is a major challenge for the future. It is important that we take action now to address the challenges that it presents. This includes increasing access to education, improving medical care, and promoting sustainable development.

There are a number of ways in which we can address the challenges of the growing world population. One way is to increase access to education. This will help to improve the health and well-being of people, and it will also help to create more jobs.

Another way to address the challenges of the growing world population is to improve medical care. This will help to reduce the number of people who are dying from preventable diseases, and it will also help to improve the quality of life for people.

Finally, another way to address the challenges of the growing world population is to promote sustainable development. This will help to ensure that we have enough resources to support the growing population, and it will also help to protect the environment.
